

NARRASCAPE *URBAN ENVIRONMENT AS NARRATIVE SYSTEM*

Workshop at School of Architecture, Nanjing University

THEMES:

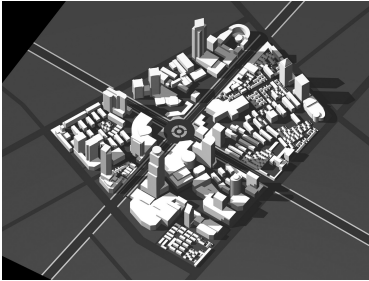

<Speed-Space, instructor: Wowo Ding> Urbanity and modernity express themselves through 'speed', the dimension of change; on the contrary, traditional gardens are experienced in a slow and rhythmic 'speed'. This workshop experiments with these two speeds and their contrasting spatial cultures.

<High-Low, instructor: François Penz> There are paralleling and contrasting perspectives on urban space: an aerial view that schematizes urban space as a spatial organization VS. a grounded view that narrates space as concrete places and episodes. Contemporary cities are often envisaged from above but consumed from below.

VENUE: Science and Technology Building, 10th-12th Floor, 22 Hankou Road, Nanjing

DATES: Monday 6th April – Saturday 11th April 2009
